Multi-Step Property Evaluation

Free-of-charge

Information Gathering

We start by collecting essential details about your property, such as size, amenities, condition, and unique features that may affect its rental potential. This comprehensive data forms the basis for our assessment.

Face-to-Face Consulting

This step ensures a personalized experience, catering to your unique needs and preferences. In this meeting, we cover your goals, expectations, and any concerns about your property's rental prospects.

Rental Rate Validation

This validation relies on a detailed analysis of location, market trends, and historical data. Using this info, we ensure the rental rate is precise and competitive in the current real estate market.

Our Services

Proactive & Intentional Marketing

We use our “property match” feature to identify tenants looking for properties like yours and make contact through phone, email and text message.

Resident Selection

We collect all of the necessary information and do a detailed financial analysis to ensure each tenant can afford the rental payment.

Maintenance & Inspections

We have a 24-hour maintenance hotline that dispatches urgent repairs in a timely manner. We also have agreements with local vendors to get you the best rates for quality workmanship.
